

PROVA ORALE N. 1

- 1) Criteri di aggiudicazione di un appalto secondo il D.Lgs. 50/2016
- 2) Che cos'è un database
- 3) Are medico-legal implications considered?
Have the medico-legal implications of using this particular health technology been considered?
Information on litigation risks and professional indemnity insurance may be of relevance in this section, should it be discussed.

PROVA ESTRATTA

Qualificato

PROVA ORALE N. 2

- 1) Ruolo del Direttore dell'Esecuzione del Contratto (DEC) secondo il D.Lgs. 50/2016
- 2) Che cosa è una "Intranet"
- 3) Is an economic analysis provided?
Has there been an analysis of the economic impact? May include cost or economic studies of similar applications; the basis for selection should be given.
The approach to any synthesis and extrapolation of results from the literature selected should be described. If the HTA report includes cost or economic analysis, details of methods used and assumptions made are required. The quality of available studies should be considered. There should be adequate sensitivity analysis.

Carlo Meloni

Carlo Meloni

PROVA ORALE N. 3

- 1) Cos'è il Mercato Elettronico della Pubblica Amministrazione?
- 2) Cos'è un Malware
- 3) Are ethical implications considered?
Any specific issues relevant to the technology should be included. This may include issues of access, equity and informed consent concerning use of the technology in the local health care system and community. There should be a description of what has been done in the analysis, including the arguments and approaches used. The basis for discussion should be clearly outlined.

PROVA ESTRATTA 09-07-2020

Maurizio

PROVA ORALE N. 4

1) Differenza tra microshock e macroshock.

2) Cosa si intende per sistema RIS-PACS

3) Are social implications considered?

Any specific issues relevant to the technology should be included. This may include issues of the impact of this technology on carers, family dynamics, social isolation, ability to stay in the home longer, early return to work, relevance of particular sub-cultures, likelihood of employment, "disease labelling", among others.

PROVA ORALE N. 5

1) Classificazione dei locali ad uso medico secondo la CEI 64.8

2) Esempi di telemedicina

3) Is a wider perspective (stakeholders, patients, consumers) considered?

Any organisational issues specific to the national, regional or local health care system that are related to the acquisition, implementation and operation of the technology may be discussed. This might include the impact of the technology on hospital provision of services, provision of services in rural and remote areas, or workload and workforce implications. Issues regarding training and credentialing of people operating the technology, along with patient compliance and uptake might also be considered. Sources of information should be clear and analysis transparent.

PROVA ESTRATTA

Andrea Sorm

PROVA ORALE N. 6

1) Differenze tra parti applicate di tipo BF e CF.

2) Differenza tra Hardware e Software

3) What sources of information have been used?

Details of the literature search should be provided. These should include key search terms and combination of search terms, databases used, years covered, and any language restrictions.

Details of the use of primary data and other sources of information should also be given.

Details of the source and basis of any cost data should be given, preferably with comment on their accuracy.

Inclusion and exclusion criteria should be provided. The report should indicate who has undertaken the selection and how this processing was done.

A complete reference list of included studies/bibliography should be included.

A list of studies that met the inclusion criteria but were eventually excluded, and reason for exclusion, should be provided.

PROVA ESTRATTA

Monica Ballarè

PROVA ORALE N. 7

- 1) Definizione di sistema elettromedicale
- 2) Cosa si intende per Algoritmo
- 3) Some reports will include more extensive details of the literature search. It is suggested that full details of the literature search should be available on request, but not necessarily included in the report. Quality and relevance of cost data will vary with their source and nature, which may range from administrative data collected for other purposes to a bottom up approach specifically directed towards the assessment being undertaken. If arbitrary values have been assigned to costs, appropriate justification should be provided.

PROVA ORALE N. 8

- 1) Definizione di dispositivo medico
- 2) Cos'è una App
- 3) This checklist has been prepared as an aid to furthering a consistent and transparent approach to health technology assessment. A general theme is the clear identification in an HTA report of what has been done in an assessment and of any significant limitations in the analysis. A key to improving the usefulness and generalisability of HTA reports is to aim for transparency in the assessment process. Assessments will vary considerably in their depth and scope of analysis, given differences in the types of problem being addressed, policy requirements and the time and resources available for assessment.

PROVA ESTIVATA

09/07/2020

Alena

PROVA ORALE N. 9

1) Definizione di parte applicata

2) Il WiFi nell'ambito sanitario

3) The checklist is intended as a guide both for those who use HTA reports as a source of information and for those who prepare such documents.

For those reading reports prepared by other organisations, the checklist gives guidance on what to look for in an HTA report and in assessing the reliability of the information provided.

For those undertaking HTA, the checklist gives points that should be considered during the planning, conducting and reporting of the assessment. It is hoped that this guidance will help to improve the quality of HTA reports.
