Radiology for the Future.

Based on more than 140 years of imaging expertise, Agfa HealthCare is your trusted radiology partner for the future. Today, only a small number of patients receive the lowest X-ray dose technically possible, our digital radiography upgrade program, "Fast Forward", drives dose down with 50% and more. The radiologist is the diagnostician of the future: by providing the clinician with actionable knowledge about the patient treatment, the radiologist will be at the center of the patient's care.

Satellite Symposia

Industrial Satellite Symposia are organised by various international companies. These sessions are a chance to get an industry perspective on various scientific subjects, including technical updates, emerging trends and future innovations.

The symposia vary in length from one hour to 90 minutes, with the number of speakers also differing between companies and subjects.

Places are allocated on a first-come, first-served basis.

Please note that Satellite Symposia are no longer CME-accredited.

Satellite Symposia organised by

Bayer HealthCare, Bracco, GE Healthcare, Guerbet,
HIMSS (*Healthcare Information and Management Systems Society*),
Hitachi Medical Systems, Hologic, Philips, Samsung,
